

## HYUNDAI VELOSTER AND VELOSTER TURBO WING

### INSTALLATION INSTRUCTIONS

This fiberglass part comes with a gelcoat finish and should be painted prior to installation. *It is recommended that you do a trial fit prior to painting.*

1. Remove the cover inside of the car, and disassemble the washer hose and electrical connections. Remove the factory wing.
2. Remove the factory light. NOTE: You will be reusing this light.
3. Attach the factory light to the new wing with the supplied screws (photo 1)
4. TURBO INSTALLATION: The washer nozzle fits into the receiver hole and is held in place with the light. You can use a small amount of silicone adhesive if you wish. (photo 2)
5. Attach the cover plate.
6. Bolt on the new wing with the supplied hardware. (photo 3)
7. Connect the washer hose and electrical connections.
8. Replace the cover inside of the car. (photo 4)
