

Quick directions for use - Each Ramp/Gate includes: ReadyRamp® (1), Post mounts (2), Keyhole mounts (2), Latch mounts (2), Nylon strap mounts (2), O-rings (6), Toyota Tundra mount set (1), Instructions. Only four mounts are used for any truck installation - the extra hardware allows one ReadyRamp® to fit all trucks in its category (Compact or Full-Sized).

Post Mount Tailgates

Step 1: With the tailgate open, position the **ReadyRamp®** so that it encloses the open tailgate. Insert the post mount into the tailgate and push down. After the tailgate latch is engaged, secure it with the nylon strap and buckle.

Step 2: Use the keyhole mount strap at the upper post to secure the **ReadyRamp®** at both sides. Make sure the cam buckles are facing out.

Step 3: The included O-rings are used to keep the extra strap material from flapping.

IMPORTANT: Always make sure all mounts are secure and nylon straps are tight before moving the truck and always get help when using the ramp function!

Latch Mount Tailgates:

Step 1: With the tailgate open, position the **ReadyRamp®** so that it encloses the open tailgate. Insert the latch mount into the latch mechanism. The cam buckles face outward. Secure it with the nylon strap and buckle.

Step 2: At the point where the tailgate connects to the truck body, lop the straps through the hardware to secure the **ReadyRamp®** at both sides.

Step 3: The included O-rings are used to keep the extra strap material from flapping.

IMPORTANT: Always make sure all mounts are secure and nylon straps are tight before moving the truck and always get help when using the ramp function!

Toyota Tundra Installation Tips: Toyota Tundra users will need to install the nylon post and screw to the latch mount, and then mount per 'post mount' instructions above.

CAUTION: The truck tailgate maximum load rating may be LESS than 1,000 pounds - check the owner's manual before overloading the tailgate. Always check the **ReadyRamp®** before use - don't use a damaged unit. Always secure the **ReadyRamp®**, whether in use or closed in the truck bed. Never mount a **ReadyRamp®** on a tailgate that is narrower than the ramp itself. If you think it might be dangerous, DON'T use a **ReadyRamp®** to do it!
